The Standard AND RIVER PLATE NEWS.

No 2,940—Eleventh Year. BUENOS AYRES, SUNDAY, MARCH 3, 1872. Circulation, 3000.

MAUA BANK,

101—103 CALLE CANGALLO

The Offices of this Bank having been removed to the above spacious building, in order to suit the increasing flow of business, the public is informed that the following transactions are carried on in currency and specie in this Bank:—

First—Bills and obligations with good signatures are discounted on conventional terms.

Second—Money is advanced on mercantile and other securities approved of by the Manager.

Third—Accounts current are opened with Merchants or other parties who may prefer depositing cash which they may draw up to an amount previously concerned under conditions established for such class of operations.

Fourth—Money is received in account current bearing interest from day of deposit, which is accumulated in favor of the parties every three months, the depositors being allowed to retire at any time, by means of cheques, part or the full amount at their wish, save when the quantity exceeds three hundred doubloons or one hundred thousand dollars currency in which case forty-eight hours' previous notice is required to be given to the Treasury of the Bank.

Fifth—Bills or letters of credit are drawn and taken on Montevideo, Rosario, Sta Fé, Salto Oriental, Paysandu, Rio Janeiro, and other places in the Brazils, England and France, as also on other places, of which notice will be given hereafter.

Finally, the Bank undertakes and executes all legitimate transactions within the orbit of banking operations.

The establishment is always open from 10 a.m till 3 p.m.

P. P. Maua & Co.
M. A. de FREITAS AMORIM.

January 1st, 1868.

J. LIVESEY'S PATENT PERMANENT WAY MATERIAL.

For Main Lines, Light Railways, and Street Tramways.

J. Livesey's Patent Cast and Wrought Iron Sleepers, or Compound Sleepers of Wood and Iron, possess a degree of elasticity equal to any timber road, and are adapted for heavy and light railways or street tramways.

They are peculiarly simple in construction; the keys for tightening the rails are of iron, and are so arranged that no vibration can loosen them.

Nearly one thousand five hundred miles of railway have been laid with them, and this system has been almost universally adopted by ramway companies.

Sole agent for J. Livesey in Buenos Ayres—
WELLS HOOD, ESQ.,

It being an admitted fact, that "Money makes money," the object of LA BIENHECHORA could not be better, since it opens a vast Savings Bank for the surplus or savings of the Public so that, by the proper employment of these small gains, a moderate capital, or even annuity, may be secured in a short time. By this means a provident, though helpless, family can husband the small means, and, in the end, attain a competency.

It being proved that the accumulation of interest is the most powerful means of augmenting the capital, THE BIENHECHORA DEL PLATA—an Argentine Company, whose only investments are in the country—holds out to Subscribers greater advantages than any other Institution, by reason of all its dealings being in the River Plate, where are current as large interests as in any part of the world.

THE BIENHECHORA DEL PLATA receives Deposits of from Five Patacones per Annum up to any amount in Weekly, Monthly, or Yearly Instalments.

Subscribers enrolled and all necessary information given at the Head Offices of the Company 112½ (altos) Calle Florida, Buenos Ayres

GOVERNMENT MORTGAGE BANK

Offices—111 CALLE SAN MARTIN.

This Bank will be open to the Public on all business days from 10 a.m. to 4 p.m.

It advances on real estate to be repaid at long dates.

It pays Mortgags Certificates (Cedulas Hipotecarios) for the amount of the loan it advances, which bear an interest equal to that collected by the Bank.

The value of property offered in mortgage shall not be under two thousand patacons, nor the loan be less than 500 fuertes.

No loan can exceed half the value of the property mortgaged.

The Mortgagor shall bind himself to pay an annual sum so long as the mortgage lasts, said sum to represent the interest on the sum lent the amortization fund and commission to the Bank. This yearly sum shall be paid quarterly or half-yearly.

Series A—Quarterly.

Mortgage for 20 years 117 days, 8 per cent. interest, 2 per cent. amortization, and 1 per cent. commission.

Series B—Quarterly.

Mortgage for 27 years 270 days; 8 per cent. interest, 1 per cent. amortization, and 1 per cent. commission.

Series C—Half-yearly.

Mortgage for 20 years 190 days; 8 per cent. interest, 2 per cent. amortization, and 1 per cent. commission.

Series D—Half-yearly.

Mortgage for 28 years 5 days: 8 per cent interest, 1 per cent. amortization, and 1 per cent commission.

Upon the full payment of the yearly sums stipulated in the Mortgage, both property and Mortgagor shall be freed from all further obligation.

The Mortgagor shall be at liberty to anticipate the payments and to discharge the mortgage, all or in part.

Applications for mortgages must be made in writing, specifying the property offered, accompanied by the title deeds, the receipts of the Contribucion Directa tax, and setting forth that the property is free from all incumbrance, or if not the incumbrance that exists thereon, and which is to be paid off by the mortgage. The Secretary of the bank will supply applicants with the forms necessary as also the tables for amortization.

Quarterly mortgagers shall pay from 8th to 15th of each January, April, July and October, and half yearly mortgagors shall pay between the 8th and 15th of each January and July.

With the amortization fund, mortgage certificates (cedulas) shall be redeemed at par by quarterly and half yearly drawings.

The mortgage Bank pays the interest on the quarterly cedulas or mortgage certificates between the 31st December and 6th January, the 31st March and 6th April, the 30th June and 6th July, the 30th September and 6th October every year, and on the half yearly cedulas from the 31st December to 6th January, and from 30th June to 6th July.

The Mortgage Bank can act between the capitalist and mortgagor, free of charge in the way of realizing the cedulas, and for this purpose will receive deposits without interest, which will receive a preference, and which sums will be deposited in the Provincial Bank.

On and after the 15th February 1872 the Mortgage Bank will be open to the public.

Jose M. La Fuente,
Secretary.

SUNDAY, MARCH 3, 1872.

THE VIALE MONUMENT.

In giving to our readers the letters at foot, a rather welcome occasion is afforded us to advert to a subject that has been handled by a contemporary with all the acidity of mortified vanity and rebuked selfishness. There is no higher test of character than a generous appreciation of true merit. The sublime heroism of Sr. Viale on the wreck of the America broke upon the public mind with all the interest of novelty and all the brightness of unexampled self devotion. Yet there were some who, blind to its magnificence, condescended to question the details, and appealed to the selfish incredulity of the public; the irresistible force of Madame del Pont's own statements to Col. Murature, the very lady for the salvation of whose life Sr. Viale surrendered his own, however, rebutted the argument. Our cherished opinions of the heroism of the Italian suffered nothing by the most searching investigation, and the history of Sr. Viale's self devotion, and the facts connected with his martyrdom as already published are to the last letter sustained by the surviving actors of that imperishable drama.

It is pleasing to think that with all the checks that surround us in life, the shrine of real moral bravery will never want devotees. Chivalry in the present day is a rare exotic, and when we address ourselves to its consideration we rise so far above the fashions of the hour as to incur the censure of minds who disdain such heights, and glibly tell us of that region where sublimity and nonsense hold divided rule.

But we are prepared for all this; from narrow survey of the affairs of mankind no principle of universal morals can be well deduced. The great axioms of eternal virtue are rather obscured than illustrated by the complexity, the insignificance and the obtrusive glare of those everyday occurrences which occupy us all. Each man is straitened in his sphere of observation and of thought; this experience, great though it be, is incalculably small when compared to that of the whole human family, of which he is for the time a member.

Materialism is the education of the million. Our pursuits and thoughts are narrowed to a single path, passing which, all is either extravagant folly or downright nonsense. Things eternal and universal are unseen; things partial and temporal are alone beneath the range of our observation. What wonder, therefore, that an act for which history can rarely point a parallel should create in some minds feelings more akin to jealousy than esteem?

We are to be told petulantly that Sr. Viale but played a part which every manly member of our race would act under like circumstances. We are to be cautioned against hero-worship; and the cant of repugnant Materialism is even invoked to detract from the merit of a priceless act. Well, be it so! There is, however, this to add, that whatever may be Sr. Viale's reward in another life, his name is now destined to leave a trace in the world's records. Governor D'Arcy, of the Falkland Islands, sharing in our admiration, has resolved to institute a monument to Sr. Viale's memory, great as his magnanimity, and lasting as the world itself. The highest mountains that rear their heads to heaven in the South Atlantic will henceforth be known to the mariner and to the world at large as the VIALE MOUNTAINS.

There is something so sublimely grand in Colonel D'Arcy's appreciation that we turn with a chill to the efforts amongst ourselves to perpetuate Mr. Viale's memory. A bronze statue, and all that sort of thing, at the mole-head, is the summit of our ambition; and yet to achieve even this, what efforts! Poor pigmies that we are! Whatever money has been gathered together may be tossed into the poor-box; we can safely leave to the noble Irishman who rules the Falkland Islands all that concerns the Viale monument; and dazzled as we were at the heroism of the Italian, we are even still more bewildered at the splendid magnanimity of our chivalrous countryman.

Stanley, Falkland Islands,
Feb. 15, 1872.

Gentlemen,

I enclose you a letter of the governor of the Falkland Islands to his surveyor-general, directing him to name, on his chart, a certain mountain here, after the hero of the ill fated America.

I know it will be pleasing to Standard Court to perceive the influence of your editorials even in this out of the way place, in the midst of the 999 islands that form the Falklands.

Governor D'Arcy receives the STANDARD pretty regularly, and is a great admirer of the editors' pluck, energy, and industry. He is indeed a man worthy of all praise. He is a Chesterfield, in refined gentlemanly feelings, and quite a Crusader chief in his nice appreciation of chivalry and exploits of bravery. Consequently, when he read your truly spirited and manly leader, headed 'Salvese, señora,' his Norman-Celtic heart was touched, and beat high in admiration of Viale's heroic deed of self-denial, and his first impulse was to rival Buenos Ayres in the grandeur of the monument which the Falklands should erect to his memory.

But as polished marble is not to be met with on the Falklands, the governor determined that a monument of *nature* instead of one of *art* should tell future generations who may visit these islands the history of the brave son of sunny Italy. The highest mountain on this island was selected for this purpose. It rises 2,200 feet above the level of the sea. Its summit is hidden in white, fleecy clouds, which form around it a halo, like the 'circle of glory' which painters love to cast around the heads of their heroes. The mountain rises as far above its neighbouring hills as did the noble conduct of Viale above that of his many companions of the America on the memorable night of the 24th December last.

I have no doubt this act of consideration on the part of a governor of a British colony, will give much satisfaction to the numerous British residents in the Plate. It will also serve to remind our friends, the Argentines, that the Britishers understand how to appreciate at all times courage, valor, and chivalrous conduct towards the ladies, as well as they understand the building of steamboats and working of railroads. It will also be gratifying to the many friends of H. E. Governor D'Arcy to be informed, that the colonel can display as much gallantry in the Falklands in '72, as he did courage and skill as a commander in Africa in '66. One incident, which I find recorded in Beeton's Boys Book of History is worthy of record in connection with the governor's campaign in Africa, in '66. When he had led his British soldiers with success against Mabba, the old King of Baddiboo, whom he completely conquered, he received the following epistle from the fallen monarch:—"My best compliments to the Governor of Gambia, who is my good friend and helper in time of need. Now God has made me love the Governor of Gambia more and more. I love the Governor with all my heart, as I love God. In the friendship that is between us, I beg your Excellency to make me a present of a double barrelled gun."

I remain,
A TRAVELLER.

[COPY.]

Dear Mr. Surveyor-General,

Before you leave on your surveying trip, I wish you would name on the chart the two high mountains to the north-west of Mount Robinson, in the West Falkland Island, the Viale mountains.

I am desirous of faintly immortalizing in this British colony an Italian gentleman, Sr. Viale, for having given his life-belt, when in the water, to a lady, on the recent occasion of the burning of the river steamer America, with the alternative before this poor fellow of his own immediate death—an act of unsurpassing chivalry worthy of one of old Plutarch's heroes.

Yours sincerely,
G. D'ARCY,
Governor.

LATEST FROM MONTEVIDEO.

Well, it's all over with Batlle at last. The ceremony at the Government-house to-day was the finest thing we have had here for a long time. At an early hour the military were about—cocked hats and sabretasches at every corner. Towards noon the thing took shape. About 12 o'clock old Mr. Batlle, with a few friends, drove down to the Government-house—the last state drive that gentleman will probably ever get this side of the grave. The whole party looked mue hlike the survivors of the America when landed from the Villa del Salto. There was sorrow depicted on every countenance. As the coach drove into the fort the band struck up—I suppose, the national air; but it seemed to me like "Believe me, if all those endearing young charms." There was a small crowd in the patio, but not the slightest attempt at a cheer.

Mr. Thomas Gomensoro, the new President, popped in like Paul Pry soon after. Batlle handed him a chair, and then stood up and said: "Friends, Orientals, countrymen, and lovers! hear me for my cause, and be silent, that you may hear. In obedience to the Constitution, I come here to-day to hand over the affairs of this unfortunate country to the President of the Senate, Mr. Tom Gomensoro, entertaining as I do the very highest opinion of my own political rectitude, having always proceeded with firmness for the good and happiness of the country—"

Hereupon Mr. Tom Gomensoro received the trust, and rising, said: "Friends, I will begin by promising nothing (sensation); yes, friends, nothing, save a decided wish to compliment justice, law, and my own conscience; and I look to the Red party to help me in my programme."

Things then settled down; every one looked at each other, to see what next. At last the position of all became so irksome and Pickwickian that Field Marshal Suarez rose and said that if permission were granted to him he would like to talk. As silence gives consent, and every one remained silent, the General went on: "The duty of the Orientals at this moment was to obey and respect the authorities, and the Red party, now more than ever, must remain united. The Legislature should also support the authorities and help them in their administrative march, in order that by continually marching on, the authorities may in a short time pacify the Republic." The General then touched up the merchants. As for the merchants, who are so mightily anxious for peace, let them come forward and help the authorities, in order to reach in an efficacious manner the result.

The General, seeing no applause, called for three cheers for himself and the other officers of the army.

Colonel Salsona then came forward, and apostrophized Mr. Gomensoro as follows: "The Port Captain, whose speech you now, sir, have the honor of hearing, speaks for himself and every one in the Capitania. I and they felicitate Mr. Gomensoro on having deserved the elevation to the post of President of this Republic; and down on our bended knees, at the Capitania, we are all praying that Divine Providence will illuminate the Government of your Excellency, so that your resolutions will have the necessary certainty for the future of the country."

Then the late President Batlle looked round, to see if there was anything else. In the way of lunch, there was nothing save an odd split-soda in the next room. All considering the business of the day over, the ex-President made his exit, walking arm-in arm with Suarez and Solsona; the aides-de-camp and unwashed remained behind. All the clerks of the Government-house were there, and the escribano drew up the "acta." The scene then dropped.

Is is freely said in town that when Batlle and his friends left, Gomensoro ordered the room to be cleared, and flinging himself on a couch, burst into tears. The past, present, and future lay before him—the panorama was too much for the man, the citizen and the Senator. So long as the old woman was present he mastered his feelings, but now that he was alone a sense of the risk he was in for completely unmanned him; the country looked as shut up like a jack knife, and no one to open it. Then the feeling address of the Port Captain touched him, just the idea of all the boys at the Capitania on their knees praying to Divine Providence to illuminate him. How long the President might have remained in this bitter soliloquy there's no knowing but soon there was a row in the yard outside. What's up? shouted the President. Aye, aye, Your Excellency, it's the Baron de Cotegipe—and the Baron it was. Five minutes after, Professor Aggassiz. Then....., the banker. It was late before the shutters of the Government House were put up. Gomensoro walked home, but the day was a life time; the hollow eye and vacant grin showed how the Government House had told on his new Excellency. There are bets in town that he won't hold out a week—there is resignation in his very gait.

The latest news outside is that Salvanach is captured. Aparicio is as busy as a bailiff collecting the Contribucion Directa in Taeuarembo. Castro has got two new pieces from the Mount, and is moving his whole army (3,500 men and horses) up the river, where there is more shade and less sun.

At 3 p.m. to-day a chasque was sent out to the army; some say fighting is already going on in some quarters, as for peace it is 'all up the spout,' and Ramirez, they say, will now be sent on a special mission to China to arrange about getting some cheap celestial recruits.

Two new papers are to be out next weeks. The *Aurora*, a girls' paper, you can well guess what it will be like; and the *Republicano*, with J. C. Gomez, and other stars, for pens.

Batlle's valedictory is out, you will find it in the *Telegrafo*; it is not worth the trouble of translating. The usual style, it might read well in English under a *free* translation; look it up.

The new President Gomensoro has moved into his new quarters, splendidly fitted up for him in the Calle 25 de August, the ancient house of Mr. Farini, who, with patriotic gallantry, has placed the place at his orders.

Another loan will be concluded to-morrow, they say, by Sr. Farini. Dr. Elowry is to be minister of foreign affairs; Reguniga, governmt; Alavarez, hacienda; Suarez, war. Apropos of the new government, they say here that the whole thing is a sham, that there is no government at all, and that the foreign powers will only recognize them as acting clerks. In fact, according to some reading of the constitution, there is now no government at all.

The Neva they say brings two hundred thousand sovereigns for the Montevidean Government besides other remittances for Buenos Ayres.

Four new lawyers were admitted yesterday and 4 Colonels are to be made Generals; take a note of that.

Buenos Ayrean horses are now all the go here, they come down by every steamer; splendid ones are to be seen at the stable yard facing the Washington Hotel.

The new Uruguayana R. R. is the topic amongst the engineers; it is to run from Salto to Uruguayana; as yet there is no concession.

We have had a sale of fomento shares at 3 per share, one thousand shares; time was when they fetched 300 per share. There is a great deal more news but I have no time to send it; last night there was a horrid row on Rad Island, as yet no one knows the particulars. A cheque for 49 Patacons has been sent up on Stump, subs to the Viale Monument.—Enamorado, who is known to every one, has come out again and is in quarantine. The very latest—but dont mention its—something in the wind, great agglomeration of Blancos in town, things looking mighty fishy gold rising, credit falling, revolution roaring, enough.

Yours
CHESTERFIELD.

LATEST FROM CORRIENTES.

(*Our own Correspondent.*)

Corrientes, Feb. 27th.

The revolutionary army has gradually fallen back on the Arroyo Sombrero, to pick up the scattered parties: they have about 3500 men, including 800 foot, and 8 pieces of cannon. The Sombrero is about 6 leagues hence, on the road to Empedrado.

Baibiene with 800 foot and 1000 horse was till yesterday about 7 leagues further, on the Empedrado arroyo, but seems to have fallen back to Saladas. No battle. Some days previous he had a conference with the rebel chiefs and it was agreed that Gov. Justo and Vice-Gov. Calvo should resign, but the terms were broken off as regarded a Provincial Governor.

It seems the Italian, Spanish and Brazilian Consuls offer mediation.

Gov. Justo is at Goya and talks of confiscating his enemies.

NATIONAL TELEGRAPH WIRES.

Mr. Charles Burton, the Inspector General of Telegraphs, has published in the *Tribuna* an interesting statement of the present telegraph system laid down by the National Government through the various Provinces. Our readers are hardly aware of the magnitude of the business which is at present done, amounting often to 300 messages daily from Buenos Ayres to the Interior.

We glean from the report before us that there are 7 district lines either actually working or approaching completion viz:—

1. Buenos Ayres to Rosario and Cordoba.
2. Cordoba to Santiago, Tucuman, Salta, Jujuy, Rioja and Catamarca.
3. Direct line to Cordoba.
4. Villa Maria to Mendoza and Chile.
5. Rosario to Parana and Corrientes.
6. Buenos Ayres to Diamante and through Entre-Rios.
7. Extra line to Rosario.

As regards the condition of these lines Mr. Burton says;—

"The section from Rosario to Parana is in pretty good condition, the wires crossing the Carcarañal about 3½ leagues from the bridge and traversing a great lagoon and swamp near Coronda. Near Santa Fe there are 3 miles of posts for half the year under water, and from Santa Fe to Parana four cables are laid across the river, between the islands.

"From Buenos Ayres to Rosario the line is pretty well laid, passing by Zarate, Baradero and other river ports. There are, however, some nasty swamps, especially the Bañado de Areco, where I was nearly drowned with two of my men; the workmen had to carry on the repairs in water beyond their depth, while the wires were stopped working for a week.

"Between Rosario and Cordoba the works were so defective that the repairs cost $f.800.

"From Cordoba to Santiago the wires sometimes go along highroads where the ox-carts knock down the posts, and other times the line passes through woods where fires at times break out and burn down the posts. Repairs then are very difficult the workmen being hard pressed for food and water. There are long distances to run, for example 154 miles from Chañar to Santiago, without an intermediate station.

"From Santiago to Tucuman, 95 miles, the line is well made, over even ground.

"Between Parana and Corrientes the wires cross numerous swamps, rivers and woods, and have suffered much from storms and rebels, sometimes 15 posts knocked down in one place.

"The funds provided by Congress for keeping the wires in repair, at present 1,400 miles, which will soon be doubled, are only 1000$fts. monthly, an insignificant sum. The inspectors or Guarda-Hilos have their salaries reduced from 60$ to 30$ per month, and must keep their horses besides.

"Last December the receipts of our office amounted to 6,000$fts. and under the new tariff in January we took 5,000$fts. but as the increase of business was 50 per cent. the clerks were not able to use the same celerity in the work.

"We require 2 extra wires from B. Ayres to Cordoba, besides others additional from Buenos Ayres to Santa Fé and Entre Rios. The proposed railway to Rosario might also have a new line of wires. Of the present wires to Rosario the one that touches at Belgrano, Zarate, San Nicolas &c. can forward 6 messages hourly; and the one that goes direct can take 20 messages hourly; together 208 per day, leaving often 100 messages over till next day.

"Congress should pass severe penalties for cutting the wires, as the offenders are not always Gauchos but people of position and education whom the local authorities hesitate to punish.

"I am doing my best to get up a good staff of native clerks but unhappily some of them write badly, others spell incorrectly, and the merchants themselves often write despatches that are hardly legible."

LATEST FROM EUROPE.

THE ALABAMA QUESTION.

THE FRENCH WOOL-TAX.

A friend has favored us with Liverpool papers of Feb. 1st, one day later than our London letter published yesterday. We extract the following:—

Great as was the excitement which prevailed yesterday on the Alabama question, we are persuaded there will be no war with America. The view of the subject which we yesterday presented is undoubtedly a serious one, and it is supported not only by the undoubted fact that the Editor of the *Times* has been in constant communication with Lord Granville, but by the signs of crisis which have appeared in other journals known to be favoured with Ministerial communication. There will, however, be no war with America: for the best possible reasons. The English do not want to go to war, and the Americans cannot. They have had enough of war. They are still enfeebled by the great struggle which cost them so much money and so many lives. Their population is diminished by it. Their resources are curtailed. At this moment they are not in a condition to speak a hostile word. Hostile words will be spoken, no doubt, but not officially. There will be a good deal of bounce, but the Government at Washington will not indulge in it. Appearances may be to the contrary, but there is more danger of a war outcry being raised in this country than in America.

The Attorney-General yesterday continued his examination of the alleged points of physical identity between the claimant and Roger Tichborne. He stated that the marks on the claimant's body were totally dissimilar from those known to have been upon the body of Roger Tichborne, and added that something on the claimant's arm had been obliterated just where Arthur Orton had the letters A. O.

Versailles, Jan. 31.—M. Pouyer-Quertier stated yesterday, before the budget committee, that he would assist the committee in every way in seeking taxes to replace the proposed taxation on raw material, but he feared that their efforts would be fruitless. The Government was more than ever convinced that the taxation on raw material was the least onerous, and the only resource. The Government, he added, would never consent to a tax on invoices and business transactions.

The Paris correspondent of the *Telegraph* says an Imperial declaration of some kind is expected to be made in a day or two, and a manifesto of the Orleans Princes, in answer to the Count de Chambord, is regarded as a certainty. The same correspondent hears that the Duke de Brogle is likely to be recalled from London.

It is said that, having been informed that steps have been taken recently to induce the Pope to reside in Austria, M. Thiers has renewed his offer of a suitable residence for his Holiness in France.

The Service of Thanksgiving for the recovery of the Prince of Wales is now fixed to take place in St. Paul's Cathedral on the 27th instant.

THE TANDIL MASSACRE.

NOTES BETWEEN THE BRITISH LEGATION AND THE NATIONAL GOVERNMENT.

The *Boletin Official* of yesterday publishes the subjoined notes on this painful question; the reply of the Minister of Foreign Affairs to Mr. McDonnell will cause a mixed feeling of astonishment and indignation among all classes of English residents—

British Legation, B. Ayres
January 13th 1872.

To H. Ex. Dr. Tejedor
Minister of Foreign Affairs
Mr. Minister

In the interview that I had yesterday with Your Excellency I thought it my duty to advise you of the contents of two petitions addressed to me, one from the English residents of Tandil and Azul referring to the insecurity of their lives by reason of the recent assassinations in that neighborhood, the other signed by English subjects settled at Bahia Blanca making just complaint of the Indian invasions thereabout owing to the unguarded state of the frontier.

The tenor of your reply on this subject manifestly indicated that Your Excellency did not consider the circumstances warranted any diplomatic intervention in favor of the petitioners, and moreover that in case they had addressed themselves to the National Government in due form and through the local authorities, Your Excellency did not judge it compatible with the dignity of Government to admit that foreigners settled in the Republic should arrogate to themselves the right to question the acts of the Government upon points of internal administration either indirectly or by means of their representatives.

The instructions which Her Majesty's Secretary of State for Foreign Affairs has at various times thought fit to give me, to represent to the Government of Your Excellency the necessity of adopting some means for the better protecting the lives and properties of Her Majesty's subjects in the Republic, at once led me to infer that the opinion of Her Majesty's Government differed so essentially from Your Excellency's views that I considered it useless to insist further upon this point with Your Excellency.

My object in communicating verbally to Your Excellency the contents of the petitions in question was to convince Your Excellency, if possible, of the justice of the cause that I sought to defend, and thus avoid a possibly vexatious correspondence upon a matter in which Your Excellency's opinion seemed entirely opposed to that of Her Majesty's Government, laying down the principle that a Foreign Agent has no right to interpose with Your Excellency's Government in favor of the life and property of his countrymen who are unduly exposed owing to the admittedly unprotected state of the frontier, or to the numerous criminals and malefactors who are allowed to go about unmolested and with impunity through the country.

Wishing, nevertheless, to inform in proper manner Her Majesty's Government respecting the late sad occurrences, which have occasioned grave loss of life and property to English subjects in various parts of the Republic; and being, moreover, anxious to explain the want of success which has attended my interposition with the Argentine Government for the better protection of my countrymen, I feel it now my duty to place in Your Excellency's hands translations of the above-mentioned petitions, hoping that Your Excellency's reply to this communication may enable Her Majesty's Government to form an exact judgment of the limits to which, in Your Excellency's opinion, the right of any British subject may extend to demand relief and protection, and which Her Majesty's Government may think fit to accord.

Trusting that Your Excellency will receive this communication in the same friendly spirit in which it is conceived,

I avail myself of this occasion to repeat the assurances of my esteem.

H. G. MC. DONELL.

Foreign Office, Buenos Ayres,
January 22nd, 1872.

To H. B. M. Chargé d'Affaires
H. G. Mc. Donell
Mr. Chargé d'Affaires.

I have received the note and petitions enclosed of English citizens upon events of distinct nature in Tandil and Bahia Blanca. The zeal which Mr. Chargé d'Affaires displays on this, as on other occasions, for the welfare of his countrymen, is worthy of all eulogy.

The contents of the petitions are also excusable, in one case by the terrible misfortune of which the petitioners have been the victims, and in the other by the natural desire of all men at all times to secure their lives and property. But notwithstanding these considera-

tions, the Argentine Government cannot accept the doctrine which seems to have induced the petitioners to address themselves to Monsieur le Chargé d'Affaires.

Foreigners, from the moment they enter a country, are subject to its Laws and Authorities. These laws are not equal in all places, but whether favorable or not to a foreigner, they oblige him alike. The foreigner, therefore, in the exercise of his rights, or in any complaints of a civil or criminal nature which he feels justified in making, must address himself in the same way as native citizens to the Authorities, invoke the Laws in question, and await and bow to their decision.

Otherwise the body of foreign residents would constitute a State within a State, a political monster.

If from these general principles, which form the jurisprudence of all civilized countries, we descend to our own particular case the matter is still more evident. In no place is there a more liberal legislation than ours towards foreigners. Protection to a foreigner is not only incalculated by our Laws but is a principle of our Constitution, rnedering almost unnecessary those treaties with such stipulations; but it means equal protection with native citizens, and no privilege either on the basis of rights or in the mode of vindicating them; it is legal, not diplomatic, protection. The latter, out of respect for any nation, is usually reserved until such case as there is a denial of justice in civilized countries, or where there is an unjust persecution by the Authorities themselves in barbarous countries. We need not mention here the other small services which diplomacy may render to a foreigner, by facilitating his access to the Authorities, by saving him the trouble of a different language, by recommending or supporting the quick despatch of matters, since it is the universal custom in civilized countries not to place any difficulty or obstacle in the way.

The doctrine of a special protection is not only incorrect but may lead to deplorable errors and mistakes. By such a mistake the English citizens of Bahia Blanca address Mr. Charge d'Affaires, advising him of robberies by the frontier Indians, the surprise and assassination of Mr. Thomas Jordan, the presence of some of the murderers in the town and the sale, there, of the stolen hides, instead of applying to the competent Authorities or accusing them before their superiors if, as is stated, the former encouraged such deeds, and prove such charges. By the same error the petitioners have ventured so far as to say that, since they receive no protection from Government, they, who do not even act as Urban Guards to protect the frontier towns, will open fire on the Indians wherever they see them, even if not attacked by them, thus assuming to themselves rights which the natives of the country have not, and considering themselves entitled to more protection than the natives. By the same error, in fine, the petitioners of Tandil beg Mr. Charge d'Affaires to point out to the Government of this country the absolute and urgent necessity of taking the requisite measures to judge and execute the prisoners on the scene of their crimes, and to order a determined and vigorous pursuit of such of the malefactors as are still at large, instead of contenting themselves which such measures as at the earliest moment it was the duty of the Provincial Authorities to adopt, and in with there was certainly no delay, and bowing to the Laws and Tribunals whose sway extends over both natives and foreigners.

Having thus fulfilled the desire manifested by the Chargé d'Affaires to learn the opinions of the Argentine Government on this point, I am happy to renew the assurances of my distinguished consideration.

C. Tejedor.

EDITORS' TABLE.

On Friday last at 2 o'clock p.m. Mr. Tom Gomensoro swore himself in as President of the Banda Oriental, and, significant fact, the peace negotiations blew up definitively at 6 p.m. sharp. The various persons called Generals at once received their orders, and throat cutting of men and women, sheep and cattle is by this time, no doubt, again in full swing. Aparicio was on the move the moment the intelligence reached him; the old gentleman professes himself intensely disgusted at the turn things have taken. The most serious effect of the rupture of the peace negotiations is the determination, now publicly announced, of many foreign firms in Montevideo to close their places of business and betake themselves to some more civilized land. Armed intervention is the only thing that can now save poor Banda Oriental. Mr. Tom Gomensoro has formed his Cabinet as our correspondent "Chesterfield" forecast three days ago, but there are splits in the camp already, and two or three resignations are spoken of.

We call attention to the meeting of the "Bomberos" or Volunteer Fire Brigade, announced in another column for Wednesday evening next at 8 o'clock sharp at Messrs. Mitre y Vedia and Co.'s auction mart in Calle Cangallo. The Rules of the association will be read and the estimates presented to the members.

Signor Pezzi's new opera company will be here in a month. It will perform at the Colon Theatre, and is said to be a very select one. The chorus rehearsals commence in a week or ten days.

We have papers from Corrientes to the 28th ult., but they contain nothing new respecting the so-called revolution. The rebels are still in the capital, and are organizing another battery of "Bullock Flying Artillery. Nobody knows exactly where poor Go-and-Come is, but it is hoped nothing serious has happened to him, and that he will turn up when least expected, like a tailor's bill.

Dr. Joseph Ramirez and Dr. Peter Herrera y Obes are still scribbling away at each other in the Oriental press. They have now reached "Dear Peter" and "Dear Joe" stage of civilities, and "tutoient" each other in the most touching manner. The subject matter of their letters interests no one but themselves.

Mr. Alfredo Jonas, agent for Mr. Eugene Cliquot reports the following: Champagne—The enormous prices which have been paid during the last four months for wines in bottle of 1868, 1869, and 1870 vintages, as well as for the grapes and wine in cask of this year (the quality of which being poor, will hardly be fit for consumption) fully justifies the rise. The reasons which induced such may be found in the scarcity of the produce in the Champagne districts during the last three years—1869, 1870 and 1871, which together cannot be estimated at more than a year's consumption, whilst the demand, even during, and principally since the war, has much increased. Moreover the new duty which has been imposed upon the articles used in the preparation of Champagne, such as sugar, alcohol and corks, as well as the labour of workmen, the price of which, owing to the high prices of food &c. has had to be considerably raised during the last two years, fully necessitates such an advance.

The Western Railway will reduce its fares to Flores, running steam busses half hourly. This will be a great boon to the fashionable residents thereabouts, and will probably have the desired effect of bringing down the charges on the Billinghurst tramway. Messrs. Lacroze's new line in Calle Victoria is opened, and the cars run now every minutes. With such conveniences families residing in those favored regions have no cause to complain of lack of locomotive facilities.

The value of land in the province of Buenos Ayres may be fairly estimated by the quarter league sold last week to an Irish sheepfarmer for $250,000 m|c. with azotea house, seven leagues from Navarro, eight from Mercedes, and four from Freyre Station on the Western Railway; rented at 65,000 dols. m|c.

The earthworks for the double line on the Belgrano Railway were begun last week by Messrs. Simpson & Co. with a gang of about fifty men. The first sod was turned without any foolish display in front of the Pobre Diablo, on the river side of the present track which it crosses near Palermo.

Art can never beat nature. We are reminded of this homely truth by a present received the other day from the chief engineer of the Rio Vermejo expedition. It is a simple piece of Rock Salt as delicately white as though it had undergone the process of refining. In some parts of Salta (whence probably the name) it covers the land for leagues. Every here and there where a hollow occurs the rain lies, leaving a black mark round the white sides wherever the scum reaches. Thus the rain fall may be calculated to a nicety. Pity there is none in Flores.

We have cheering advices from the far South. Several native capitalists have been down to Tuyu of late, and large tracts of land sold at advanced prices. The camps on the coast are the most sought after for Saladeros and Graserias. Quite as good accommodation exists there for shipping as at Ensenada. Land may be had for half the price and, last not least, it is further from our enlightened Government. Saladeristas complain that they have been treated so arbitrarily by the authorities that the farther away they are the better. At Ajo an English hotel has been started, where refreshment for man and beast is provided on the most reasonable terms. Travellers generally regard this as a sign of improvement, and we think they are right.

Mr. Hambert an American has recently published in New York a very able work on Japan. He emphatically sets forth the approaching changes in the civilized world which will result from the new commercial relations between Asia and America and Europe, and from the rapid growth of European colonies in the Eastern world. He predicts the establishment of a sort of Britannic Europe in the southern part of the Pacific Ocean which will act upon Spanish America as far as the Isthmus of Panama. All the region north of that point will be drawn into the orbit of San Francisco, which now stretches arms to Mexico and British America, to China and Japan. This wonderful city must become the centre of the telegraphic system of the two worlds. The European mails from China, since the completion of the Pacific Railroad, must take the route of San Francisco and New York; in a few years, the center of the commercial world will be changed, and New York will have supplanted London.

The American papers bring news of the following important discovery:

"People who are willing to sleep shut up like a jack-knife will be delighted to know of a new process of insuring longevity. A California scientist, whose head like his back must be a trifle weak, declares that he has prolonged his life by sleeping with his finger tips touching his toes, and has invented a machine to hold the body in that graceful and pleasant position. He contends that the "vital electric currents"—on the principle we suppose of the smoke-consuming stove—"are thus kept in even circumflow, instead of being thrown off at the extremities and wasted." There is no patent upon the great discovery, and any one with a sufficiently supple back is of course free to try the experiment.

A Berlin paper, with a weakness for figures, publishes some curious comparisons of the condition of Europe at the present time with its condition a hundred years ago. Europe now has three hundred millions of inhabitants; then it had about sixty millions. The six principal Powers of Europe now engross four-fifths of its population, as follows: Russia, 71,000,000; Germany, 40,000,000; France, 36,500,000; Austro-Hungary, 36,000,000; Great Britain, 32,000,000; Italy, 26,500,000. A hundred years ago the five great Powers had but half the total population. This was before the partition of Poland.

The last news from Russia is simply terrible:—

The Russian steamship Kuma, plying on the Caspian Sea, foundered in a terrible gale. All on board, officers, crew, and passengers, were drowned. The steamer had a million roubles in treasure an board, which is a total loss.

The celebrated Porteña bridge was tried to its utmost capacity last week, not from above but from below. The Saladillo rose to an extraordinary height under the influence of the rain, and reached the level of the bridge, which stood famously, not a screw yielding.

We have interesting news from the Falkland Islands, to which we refer in another column. Governor D'Arcy, a distinguished countryman, has inaugurated a monument to poor Viale, while we in Buenos Ayres are still thinking over the matter.

We commend the correspondence between Mr. McDonnell and Dr. Tejedor on the Tandil question to the attention of our countrymen, indeed, of all foreigners in the River Plate. The Foreign Minister's way of dealing with the question is a fitting carollary to the dismal tale of blood and miscarriage of justice. The learned lawyer seems also to have forgotten his manners, and gone out of his way to slight the whole Diplomatic Corps. The lapse is so common in this country that it will excite no surprise.

The *Capital* of Rosario calls the Tramway project now before the Municipality there "una Obra Colosal." 'Tis true we live in Lilliput.

The projected Agricultural College at Rosario will be on the lands of Sr. Sotomayor, and will have attached to it an area of 20 squares for experimental purposes. It is said that Dr. Avellaneda is most anxious to see this project realized quickly.

More bull fighting is announced for to-day at Rosario. An amateur is to appear in the ring, and his relatives have already purchased their mourning garb.

Parties just arrived from Cordoba state that a considerable portion of the Central Argentine Railway was under water for a time last week owing to the heavy rain; no interruption of the traffic took place, however.

The weather changed from mild to hot yesterday morning and at midday to hotter, and looked very pluvious.

The shares of the Eastern Argentine Railway are last quoted in London at 3 per cent. discount. This no doubt is owing to the little difficulty that occurred with the Government some time ago; but it is now removed, and the shares will certainly recover when such is known in London.

Dobbs thinks that, instead of giving credit to whom credit is due, the cash had better be paid. Never confide a secret to your relatives. Bood will tell.

Our last Chilian advices state—"At a meeting of the Municipality held on the evening of the 4th inst., the Intendente informed the Board that the Chilian Minister to London had contracted with Anderson Lawson, Esq., sculptor, for the statue of Lord Cochrane. The cost is £1,350.

The ecclesiastical authorities in Ecuador have been appointed censors of all the books and printed matter imported into the republic; anything immoral or unorthodox is at once consigned to the flames.

Our advices from Rio state that Messrs. Pedro and André Lamas have petitioned for authorization to organize a society for the liberation of slaves, under the provisions of the law of September 28th. The Empress has liberated a number of her slaves.

The fecundity of the fly is extraordinary. In five generations the descendants of a single pair are estimated at *thirty thousand millions*!!

We are sorry to hear of the illness of Governor Castro who is suffering from neuralgia, and hope for H.E.'s speedy recovery.

The Superior Tribunal has just condemned a murderer to 20 years penal servitude. This is equivalent to freedom, except during the pleasant sail to Patagones; once there the criminal will soon be here again.

The Municipality is hitting out right and left, and sometimes in the right direction; nothing escapes its attention, from a tramway car to a meat cart; all the latter vehicles are to be painted and cleaned within 20 days, under pain of a withering fine on their owners.

THE CLYDE AND THE BOCA.

To the Editors of the STANDARD.

Gentlemen,

Several pointed comparisons made in the STANDARD between the River Clyde and the Riachuelo of Barracas move me to pen you a few lines in defence of the Clyde under such an odious comparison. Personally acquainted with both, I find it difficult to discover any other point of comparison than that they are both streams, and that it would be possible to excavate the bed of the Riachuelo and attempt the formation of mud-basins; whether it would be prudent to do so is a point I am hardly competent to give an opinion upon.

The Clyde was always known as a tidal river, obtaining in its lower part all the advantages of the scouring effects of the daily flux and reflux of the tidal waters; whilst its own rapid drainage stream, derived from high lands, and flowing over a gradual and sharply falling bed, gave to both its upper and lower parts that forcible, effective scour without which it could only have become a stinking mud-pool, when transformed into what it now is—the third harbor in the United Kingdom.

The district traversed by the Clyde is richly endowed with coal and iron, and is peopled by an active manufacturing community, who by necessity were forced to bring the sea as near to them as possible, in order to enable them to compete successfully in the world's trade with their neighbors.

To obtain this, they cheerfully and obstinately set themselves to remove all difficulties. First the bar, then the river bed itself was attacked and improved. Next the marine shoals were canalized and buoyed; where it was necessary the canal was limited to its channel. The river banks were improved, and raised for many miles in length, angles removed or rounded off, until they possess a stream and harbor that merit the attentive consideration of the world, capable of receiving and floating, the largest merchantmen, protected from the elements, and safe from every enemy, its defences at any moment being easily made impregnable. This great work met with no direct Government aid, and is self-maintaining.

The Boca de la Riachuelo does not possess the natural advantages of the Clyde, and in my opinion never will, with all due deference to those who think otherwise. Endow it with borrowed water from the Lujan, and without it could not be much improved. In fact, it is difficult to conceive what good this would effect at all. If we have anything to do with the Lujan let us go direct to that river itself, and find what can be done *there*, in forming a port and harbour worthy of the Argentine Republic. That river possesses a good broad channel of sufficient length and width to form most magnificent river docks, and a deep channel inside the bar, and miles of water ways in every direction. There is always abundant water, which, according to the best information, can be indefinitely augmented by a little attention being devoted to the Parana communications whilst the rises and falls in the Plate waters give an almost continuous system of currents. A comparatively small amount of dredging inside the bar would give at one thousandth part of the expense of the Clyde a much more magnificent and commodious harbour, equally secure, and free from the dangers of the Buenos Ayres roadstead; whilst at the same time the raising of the islands by means of the dredged materials would tend to narrow the channel, and by confining the water, not only raise the level, but give increased force to the currents, thereby tending to open the channel deeper, and prevent silting. Another most important gain would be that in time of war, the customhouse being beyond the reach of any enemy from the sea, would be secure, as the approaches could be easily and most effectually defended, whilst the war navy of the Republic would find a perfect shelter amongst the innumerable islands which abound between the Lujan and the Parana.

The improvement of the Island streams would so enable the Government to defend the Parana that the Lujan would become a most formidable bar to any power which attempted to ascend the Parana, leaving the Argentine fleet and Arsenals in the Lujan unaccounted for. In fact no enemy would dare to enter with the intention of remaining in the Parana, in presence of a respectables Argentine flotilla anchored in the Lujan.

In presence of necessity convenience and capacity, what is it that hinders the proper development of the Lujan or Parana Barbours? It is said that the approaches to the Bar, and the Bar itself are difficult. Are they more difficult than the shoals between Dumbarton and Greenock—is the channel at all like that of the Clyde between Dumbarton and Glasgow where an Ocean steamer, besides her own moving and guiding power requires a tug before and one behind to enable her to fetch the turns innumberable between the two above named points. These are important matters. If this Republic intends as the newspapers say to maintain her dignity before Brazil or any other maritime power, there are points to be discussed explained, and acted upon before entering upon the expenditure of Millions either at B. Ayres or the Boca. A clear, and lucid exposition of the "pros", and "cons", of the Lujan or Parana from some able and capable pen would interest many besides your correspondent.

CLYDE.

THE APPRECIATION OF B. AYRES AND ARGENTINE STOCKS.

The upward tendency of Argentine Stocks, which have risen 4 or 5 per cent. within the last month, and the strength with which they are held, are decided indications of growing confidence in the peaceful progress and general good faith of the Government. There are on every side visible signs of extraordinary prosperity in the Republic generally and its principal provinces, such as Buenos Ayres and Entre Rios, more particularly; and herein we may find strong reason for believing in the steady advance and appreciation of these Securities—Argentine and Buenos Ayres alike.

The Argentine 1868 Loan stood at 100 to 102 in December last, but, after holders had gained the douceur of the drawing and the dividend, the price receded to 94 to 96 *ex* dividend, holders seeking, by a reinvestment in the new 1871 Loan, the same advantages of the drawing (which takes place next month), and of the dividend (due in March). These considerations, together with its relatively lower price (for it is still about 2½ per cent. too cheap), have created a strong demand for the Six per Cent. 1871 Stock, which is now very firm at the recent advanced price of 94 to 94½.

The Buenos Ayres Stocks have also risen—the old Loan to 99 to 101, and the 1871 State Loan to 95 to 97, being an advance of 3 per cent. within the last month. The dividend of this latter Loan falls due in April.

But an event which has recently occurred, and to which sufficient attention has not yet been directed, places in a still clearer light the high opinion entertained by those who are best qualified to judge of the value of Buenos Ayres Stocks. Tenders were opened on Thursday, the 4th inst., at the offices of Messrs. James Capel and Co., for the surrender of Buenos Ayres Three per Cent. Bonds, to be cancelled, for an amount equal to £14,000 cash. With the exception of two small tenders, the whole was absorbed at the rate of about £75 per cent. The meaning of this is that the holders of Buenos Ayres Three per Cent. Bonds are so well satisfied with their investment, and with its prospects in the future, that they have declined to sell in the ordinary way. There being, consequently, no floating supply whatever of Stock in the market, the only means by which the Government could obtain possession of the amount required for the Sinking-fund was by the plan adopted of inviting tenders. The fact that this Three per cent. Stock has in this transaction realized about 75 per cent. becomes the more significant when it is borne in mind that French Three per Cents. stand in the market about 54, Russian Three per Cents. at 59. Portuguese Three per Cents at 38, and Spanish Three per Cents. at 32. Although, therefore, the Argentine Government has been obliged to pay a high price, this fact, rightly viewed, is a splendid testimony to its high credit. Here is the true explanation of the constant influx of British money into the River Plate, which is effecting a complete revolution in the appearance of the whole country, covering it with a network of railways, providing it with public works of every description, and stimulating production and trade in an almost incalculable ratio. Buenos Ayres never took a better measure for her own prosperity than when, yielding to the solicitations of enlightened men, whose lead their fellow-bond-holders gladly followed, she many years ago offered a settlement of her Debt upon conditions that have been most honourably adhered to ever since. When will Spain and Italy and Austria learn that hand-in-hand with their foreign creditors they can accomplish everything needed for the purposes of internal development! When will they recognise that the road to prosperity lies not in petty savings, inexcusable in point of morality, but in a hearty and generous appreciation of the sacrifices of those who have rarely been backward in responding to their appeals for assistance?—*Money Market Review*

ON 'CHANGE.

March 2, 1872.

Ounces	400
Sovs	122½
Pats	25
National Bonds	74

There is a pause in the bond market. Buyers and sellers watch the king; he does nothing, so there is nothing done by any one; if he buys all buy, if he does nothing all do nothing. There were no sales cash. For March 31st, 5000 at 74¼. At after hours there was little done; buyers for the end of March at 74½, and sellers at 74¾; and thus the market stands.

In Cedulas Hipotecarias there was increased business, 8200, in several lots, sold at 95. It is quite evident now that the market for this security is weak, and any heavy emissions will lead to a fall in the rate.

Exchange was done to-day to the extent of £10,000 at 51d. Yesterday about £20,000 passed at 51¼.

Mr. Theophilus Mendez leaves in the Neva for England. He goes to negotiate his tramway, having concluded all his arrangements here with the Wanklyn Bank, which will have the carriage of the business.

Telegrams from Corrientes to-day announced the victory of Baibiene, and the advance of the Government army 4000 men on Empedrado, as a rule the commercial public is heartily sick of this war, which is highly injurious to the credit of the country.

The Olbers entered to-day, and puts up the remainder of her quarantine 5 days in this port.

The telegram from Montevideo to-day gave as follows: paper 3½, 50 bales sheepskins, Rosario at 120, 18000 ar. wool 2nd class at 41, 50 pipes caña, 80, —Pensacola, Dolores, Cardiff, Japan, Paraguay, John Huyden, Pernambuco, Villa Flor 10,000 ar. wool at 41½.

Large transaction in this and the Montevidean wool market were spoken of to-day as concluded since the entry of the Olbers. One house is said to have bought unusually largely. The payments to-day on the Bolsa for wool bought during the week were heavy. The following were the sales in the North market this morning—

1500 arr of wool at		91
2000	do	88
1000	do	86
1500	do	91

Sold out of Deposits.

2500 ar. from	85 to 95	

In the South market to-day Messrs. Corrales and Wehmann sold 400 arr wheat at 135.

300 arr old wheat from Mr. J. Davidson's estancia at 130.

The Government has empowered the directors of the Bienhechora Company to invest a part of its funds in Cedulas Hipotecarias. The measure is consid red a good one.

The cars of the National Tramway Company have now been running for a week. The traffic is represented as excellent, although only a small portion of the company's line is at present open, the line from the South Market to the killing-ground.

The Argentine Tramway Co. (Billinghurst lines) is doing a splendid traffic and which according to present receipts—yields 12 per cent. per annum to the shareholders.

Money ruled easy to-day good bills done at 8 per cent. The sale of 200 gas shares at reserved price is talked of.

To-day the Nat Government received from Paraguay the official protest against the occupation of the Chaco. The matter is however now stale.

Among the prizes given by the Upper Provinces for the navigation of the Bermejo is a land-grant of 25 leagues square, or 625 square leagues of land, by the Province of Salta, of territory bordering on the river. It is stated that Mr. Roldan has asked the said Government to give him instead a strip of land with 50 leagues frontage on the river and 12½ in depth as in this way it would be more suitable for colonization, which is the chief end and object of the grant.

The National Government has ordered the payment of $fts.6,000 to those National Guards yet unpaid for their service in the Paraguayan war, and it is even said the Commissary who was to pay the men in question was to start yesterday for the frontiers of Santa Fe and Cordoba to do so.

Mr. Luis Huergo is appointed by the Provincial Government to carry out the works of dredging and cleaning the Riachuelo, for which he is to be allowed $12,000 m|c for himself and assistants monthly.

The Rosario Customs-receipts for the last 8 years has been:

1863	$f. 528,855	35
1864	564,836	74
1865	511,183	86
1866	792,904	80
1867	1,141,010	03
1868	1,157,186	33
1869	1,255,192	72
1870	1,408,565	65
1871	1,461,309	05
	$f. 8,821,365	56

The business has almost trebled since 1865.

Six large chests of bank-notes have arrived from the United States for the Provincial Bank.

The annual known produce of wool from all countries is approximately 1,190,939,475 lbs., of which Buenos Ayres produces one-tenth.

A commission appointed by the Peruvian Government to examine the Chincha islands, reports the existence yet of 111,000 tons of guano there. There are 200,000 Coolies in Peru.

Liverpool papers of Feb. 1st mention that it in thought the Government will reduce the Income-tax by 2 pence in the pound.

The news of the burning of the America had caused a painful sensation in England, some of the papers giving full reports of the disaster.

It seems after all that the tax on raw materials, including wool, is likely to be passed by the Versailles Assembly: even the opposition consider that no other means is left to repair the national finances.

The latest monetary advices are as follow:—

The demand for the Uruguay bonds issued in October last by Messrs. Thomson, Bonar, & Co. increases with the dividend payments and the approaching drawings. The first dividend of £3 is now being paid, and, as the loan has only been out three months, this is equivalent to 15 per cent. per annum. The first drawing is to take place on the 1st of May, and repayment of the drawn bonds will be made on the 1st of August, but the numbers will be published soon after the drawing. The fortunate holder of bonds then drawn will receive his money back at 28 per cent. premium, and the complete result of his nine months' investment of £72 will be about £34, or more than 50 per cent. But, apart from this financial phase of the matter, the most recent advices from Montevideo are of a highly gratifying character. The exports had increased, the revenue was larger, the currency was in a better state, local enterprise was active, and there was political quietude and contentment.

At the meeting of the shareholders of the London and Brazilian Bank (Limited), held yesterday, the directors were authorised to sell and transfer the business and property of the undertaking to a new company, called the New London and Brazilian Bank (Limited).

Among shipping casualties we read—

The Jacobus Olbers, from Hamburg for Buenos Ayres, has struck on a bank a Amsterdam, and sprung a leak; but the master intends to proceed if possible.

The Montevideo papers state that Messrs. Thomson Bonar and Co. intend to propose the establishment of a National Bank of Uruguay with a capital of three millions sterling, of which amount Messrs. Thomson Bonar will give two millions, and the Government of Montevideo one million out of that part of the new London loan intended to redeem the present paper-currency. The proposers ask for the usual guarantees and privileges.

The *Telegrafo* says the first act of the new President *pro tem.* Gomensoro, will be to conclude the negotiation of the new loan for $f.300,000 offered by Sig. Farini. There will soon be as many loans as Generals in that unfortunate country.

The French barque recently lost off Punta Piedra was the Modohe 205 tons, with Cadiz salt for the house of Lassalle and Co. the captain and crew escaped in a boat.

The saladeristas of Montevideo have fixed the following prices for their 'faena', viz:—30 reals for carne-gorda, 26 for the Bonite, and 21 for the Hevana beef. A few days before two saladeros of Sta. Candida and Gualeguaycun contracted for 20 to 25 thousand quintals of beef for Brazil and Havana at reserved rates. In Buenos Ayres an offer of 27 reals for carne-gorda for Brazil was refused.

The exports of produce from Montevideo between the 15th and 29th ult. were as follow:—

77,780 dry cow-hides.
19,192 salted do.
2,415 dry horse do.
2,339 salted do.
3,132 calfskins.
480 bales sheepskins.
1,019,532 kilos jerked beef.
342 pipes tallow.
6,955 bales wool.
2,000 bags flour.
200 live mules.
45 tons guano.

Besides many lesser items.
No clearances to-day.

The following is the Custom House Despatch:—

March 1st, 1872.

Kruyer and Co. crts. earthenware, 4 cs glass bottles, W. Paats and Co. 1 keg aguadiente, Davenport and Co. 1 ble brown paper I. B. SAVINGS BANK

BANK MAUA AND C.O.

101--Calle Cangallo--103

BUENOS AYRES.

The immense advantages of Accounts Current are now so generally felt and appreciated in the two great emporiums of the River Plate, Montevideo and Buenos Ayres, that there are very few Merchants who fail to keep one at the bank in which they place the most confidence.

The Bank of Maua & Co. in Montevideo has already provided for the working classes in that city a safe and profitable depository for their savings.

The sums deposited in that very important institution are daily increasing, and already reach a very large amount.

These advantages have not hitherto been enoyed in this city by an immense number of clerks artisans, working men, and servants of all classes and conditions, who are equally interested in putting their savings out at interest, thus providing themselves with a reserve fund in case of need, sickness, or old age, instead of spending them in immoral gambling, in lotteries, and other frivolities.

The Bank of Maua & Co. of this city, following the noble example of their firm in Montevideo, now offer the same facilities in this city, and has opened a Savings Bank at No. 103 Calle Cangallo from Nine a.m. till Three p.m. every day, for the reception of the savings of the classes already mentioned, Sundays and holidays excepted.

The Bank will deliver to each depositors a pass book, in which will be entered the amount deposited and withdrawn.

The depositor is permitted at any time to withdraw the whole or part of the sum deposited; in the former case the interes will be calculated up to date.

The Bank of Maua & Co. is sufficiently known to the Public by the benefit derived from the course of its operations, which are regulated on the strictest and soundest principles, and always directed to promote the general welfare.

The Bank of Maua & Co. are also persuaded that this new branch of their business will render immense service to the working classes of Buenos Ayres and its neighborhood.

Buenos Ayres, 2nd January, 1867.

P. P. MAUA & Co.,

M. A. DE FREITAS AMORIM

CONDITIONS.

First—The Bank receives at interest any sum from Twenty-five Dollars currency or one Silver Dollar upwards.

Second—The interest allowed is six per cent. (6 p. 0/0) per annum, which is liquidated every six months.

Third—The depositors can at any time retire the whole or part of the money deposited.

Fourth—Once the money deposited exceeds twenty-five thousand dollars currency, or one thousand dollars silver, the depositor, if he wish can open an account current, according to the rules established by the Bank.

Fifth—In case the depositor loses his pass book it can be replaced by another on paying twelve dollars currency, and advertising the loss in the public newspapers.

Bristol's sarsaparilla

Is prepared in the most scientific manner, by thoroughly educated chemists and Druggists, who have had many years' experience. It is not a simple extract from one article, but is compounded of extracts from a number of Roots, Herbs Barks, and Leaves, all of which are possessed of some particular virtue or power in curing the diseases that have their source in the blood and humors; and these different vegetable extracts are combined in such a way as to retain, in so full strength, the special curative virtue possessed by each. The root of the Sarsaparilla plants found in Honduras, is that which we use in this preparation; it is the kind which all medical men esteem most. About fifty per cent. of Bristol's Sarsaparilla consists of the concentrated extract, the remainder, as above stated being composed of extracts from other powerful, cleansing and healing vehetable substances. It does not contain any thing that is dagerous or injurious to health, and in this, as in nearly every other respect, is entirely different from all other preparations sold under the name of Sarsaparilla.

By having our own agents at he places where the various roots, drugs, herbs and plants, composing our medicines, are produced, we are enabled to exercise that constant care in selection which insures uniformity of excellence, and we spare no money and no effort to procure the best—and only the best—of every article entering into their composition; and it is with the most abiding confidence we say, to be sick of all nations and all countries, that, in Bristol's Sarsaparilla you have a remedy more reliable than any before offered to you, and which will no disappoint you in the cure of.

Salt Rheum, Tetter, Scald Head,
Syphilis, or Veneral Disease,
Nervous and General Debility,
Old Sores, Ulcers, Tumors,
Abscesses, Boils, Eruptions
Scrofula or King's Evil,
Female Derangements,
White Swellings,
Fever and Ague,
Chills and Fever.
& Dumb Ague.

As a means of building up the consiitution that has been broken down by the excessive use of Mercury, Iron, or other Minerals, our Sarsaparilla will be found most excellent, and can be administered with safety to the weakest patients. As a purifier of the blood and humors, in the Spring and early Summer, it will the found unfailing. It can be taken freely at seasons, rainy or dry. For some of the above diseases, the use of the Sarsaparilly must be continued a considerable time, especially for those that are hereditary or constitutional in their nature—such as Scrofula: but a faithful compliance with the directions will always relieve and mitigate, and in a great majority of cases will effect a complete cure. It will also be found, in all of the above diseases, that a cure will be greatly hasted by using our Bristol's Sugar-coated Pills, in moderate does, in connection with the Sarsaparilla; they carry off large quantities of morbific or diseased matter set free in the system by the Sarsaparilla, and in this way facilitate the return of normal functional operations.

Father Fahy Memorial Fund,

At a meeting of Irish residents held in this city on the 1st of December, 1871, it was resolved—

"That the following gentlemen be elected trustees of the Father Fahy Memorial Fund:

The Rev. Messrs. J. B. Leahy, Pres.
P. Lynch.
T. Mullady.
C. Walsh.
P. J. Canon Dillon.
E. Flannery.

It was, moreover, resolved—

"That the subscriptions received be deposited by the President of the body of Trustees in the River Plate Bank, until a sufficient sum be collected to pay all claims against the late Father Fahy."

W. WALSH,
Sec.

The Rev. J. B. Leahy begs to announce that he has deposited in the River Plate Bank, to the credit of the Trustees of the Father Fahy Memorial Fund, the following sums from Carmen de Areco and Salto, per—

Rev. L. M. Leahy	$36,000
From San Pedro, per Rev. E. Flannery	16,000
Total	$52,000
